

# Invoice receipt process

## Integration of DocuWare in Axon Ivy

**Processing incoming invoices is a complex process that must be handled in a legally compliant manner. Automating the process from invoice receipt to payment and archiving optimizes the process and makes not only less error-prone, but also more efficient.**

### Challenges

- Implementation of an invoice receipt process
- Integration of DocuWare's DMS with the Axon Ivy platform
- Legally compliant handling of the payment process
- Factual, formal, and mathematical invoice checks
- Automated export of invoice information for accounting software

### Highlights

- Seamless integration of the DocuWare environment into the Axon Ivy process
- Cyclic monitoring of the DocuWare system
- No duplicate data storage due to consistent use of references to DocuWare documents
- Use of DocuWare web controls for document display

### Solution with Axon Ivy

- Implementation of the solution on Axon Ivy and use of the Axon Ivy portal
- Integration of the DocuWare system in the backend
- Integration of the DocuWare system in the frontend
- Single sign-on via Active Directory integration and data storage in external Microsoft SQL database

### Reasons for Axon Ivy

- High data security for sensitive invoice data
- Seamless integration into existing system landscape
- Easy connection of third party systems via existing interfaces
- Adaptation of the user interface to existing appearance
